

CONTRIK
SWISS CONNECTIVITY SOLUTIONS

[PREMIUM CABLES]

The new Premium Cables from Contrik AG convince through superior sound quality and also through their professional usability and numerous ways of use.

Optimal shielding guarantees click free and noiseless transmissions.

Premium Microphone Cables

excel especially through:

- Deep capacities between conductor/conductor (60 pF/m)
- Low attenuation due to big cross-section of the conductors (2 x 0.5 mm², linear), also apt for long distances
- Excellent shielding due to double braid screen (no screen feedthrough)
- High flexibility through simple integration and PVC coating
- Surpassing constant capacities thanks to the coating of the inner conductors
- Cable for highest demands, especially for professional studio applications
- Due to a big cross-section of the conductors, very long distances can be connected

Premium Instrument Cables

excel especially through:

- Brilliant sound quality and open, expressive sound
- Big cross-section 1 x 0.5 mm²
- Optimum protection of microphony effect
- Koax cable based on copper strands
- Excels through a very high mechanic stability
- Heavy duty cable with corresponding high durability
